 " " " besides above that should be in School, ----- **118**

The increase in population for the year is **28**,
 and it is thought that there are some births that have not
 been noted, the Indians not always mentioning a new born child
 until it is a year or more old. Many of the children are
 not named for the reason that these Indians do not name their
 children until they are four or five years old. *Six of this
 increase was due to taking up Indians
 on census list who had been accidentally
 dropped at sometime in the past.*

Original

The Census of the Indians under the jurisdiction
of the Fert Apache Indian Agency, Arizona
for the year ending June 30, 1910.

Males	-----	1,101.
Females	-----	1,168.
Total	-----	<u>2,269.</u>

School Population:

Males	-----	326.
Females	-----	290.
Total	-----	<u>616.</u>

Number of children attending reservation schools,	326.
" " " " non- " "	8.
" " " not " any school,	282.
" " " " fit to attend school,	150.
" " " ,besides above who should have schooling,	132.

The increase in population for the year is one hundred forty-two(142). Special effort was made to get all of them, and it is thought that none have been missed, though it would be possible for such a state of affairs to exist, considering how reluctant the Indians are to report new births. The parents do not like to report a new-born child until such child is at least one-year-old. This was an unusually good year from the standpoint of increase in population, although a few of these contained in the increase this year were Indians not taken last year, a few having been accidentally overlooked last year.

CENSUS of the Fort Apache Indians of Fort Apache Agency,
 on June 30, 1920, taken by C. W. Croise, Supt. & Spe. Dist. Agt.
